any purpose.10 Best Call Recorder Apps for Android #1 NottaBest for transcribing your phone calls to text in real-time. You can put your phone on speakerphone and use the Notta app to record and transcribe the call in real-time.Notta provides high-quality human-like transcription for your meetings. It integrates with Zoom, Google Meet, and Microsoft Teams to transcribe your meetings. The Notta Bot will join your meeting for you and then transcribe it in real-time.Notta works on multiple devices at once with multiterminal synchronization. Users can record a call on one device and watch it unfold on a tablet or computer.When you're finished recording your call you can translate your transcript. From there, you can edit or move sections of text around to ensure they sound more natural.Price:OS:Features:Transcribe Calls to Text in Real-TimeMultiterminal SynchronizationWorks for phone call, Google Meet, Microsoft Teams, and ZoomVerdict:Notta will even generate transcriptions for individual voices. This allows you to transcribe multiple people at once. #2 Cube ACRBest for an automatic call recorder that can record calls on Skype, WhatsApp, etc. as soon as the call does. Your whole conversation—both sides—is recorded and saved for you to listen back on whenever you want. It also supports Skype, WhatsApp, Slack, Facebook Messenger, and more. The Cube ACR app allows you easily create a list of people that you want to always record when you're on a call with them. This makes it easy to record all of your most important contacts. Once contacts are selected, recording starts as soon as they answer. It ends once everyone hangs up. The Pro version for \$9.99/yearOS: Android 4.4+ can do call recording Requires Android 11+ for recording in Skype, WhatsApp, etc.Features:Record calls from your phone and other apps Mart Storage system that deletes old recordingsSelect contacts that will be recorded or not recorded or not recorded vary. You may want to play with the settings and do a few test calls before using it for something important.#3 Google VoiceBest for a full-service voicemail app with call recording functionality also gives you a visual voicemail solution. First, you'll need to make sure the recording option is enabled. You can use Google Voice to record conversations you're having on your cell phone. During a Google Voice call you can record the conversation by pressing 4. When you want to stop recording press 4 again. The other person will be notified the call is being recorded. You can also use Google Voice to switch phones during a call. If you press * (Star) any phones connected to Google Voice will ring. When you answer the chosen device the other ones will stop ringing. The call will then be transferred to the new device. Google stores recordings on its servers so you can access them at any time. You can listen and search through your recordings on the cloudVisual voicemail/Verdict: Google Voice is one of the least invasive ways to record phone calls. You won't have to grant a bunch of permissions to a 3rd party app. The person on the other side of the phone will be alerted that they are being recording .#4 BlackboxBest for recording calls with older versions of AndroidThis one is designed with a clean interface (unlike similar apps). Blackbox records both sides of all incoming/outgoing calls with decent quality backed up and synchronized with Drive. If you change phones or reinstall the app, log in with your account to get your recording the audio quality is typically pretty good. On some calls, the volume may be low for the other party. It may not be great with certain call types (like conference calls). If you mostly talk one-on-one with customers or co-workers over the phone, it shouldn't be an issue. #5 Automatic Call RecorderBest for automatically recording calls with options for who should be recorded[][][] If you want to remember all your calls and keep records of what was said, this app is a good choice. This app will seamlessly record any conversation you calls you call or who call you call yo smartphone running 4.1 and newer. There's no need to turn record on and off. You never have to worry about forgetting to turn a recorder on for an important call. There are three automatic recording settings: Record EverythingIgnore everythingI recording settingsAutomatically records callsFile Management SystemVerdict:It's free, it has decent audio quality, and you don't need to worry about turning record on and off. You can listen to recorded calls as soon as they're done. Recordings are stored under My Recordings for easy access. #6 Phone by GoogleBest for easily recording calls and sharing them with others [] Google has added call recording to the Phone app on select Android devices in select areas. You can set it to be activated by default with calls from unknown numbers. Another feature is its ability to record calls from select contacts. You can also manually select individual calls vou want to record. To find your recordings, go to the Recent tab in the Phone app. If you have more than one saved recording, tap the History to toggle between them. You can tap a recording to play it back from within the Phone app. They can also be played back from within the Phone app. They can also be played back from dougle between them. recording a call, you can go into the Phone app to share it. The recordings are sent as audio files. They can be shared with supported apps, such as Gmail or messaging apps. Google allows users to decide how long they want their call recordings saved. This is a nice feature for anyone who doesn't need old conversations cluttering up storage space. You can also choose whether or not you want audio files saved on your SD card. That can be useful if you're worried about storage space running Android 9.0+Features: Automatic Call Recordings to the cloud and through emailVerdict: The feature is exclusive to select phones and carriers. The function has to be built into the phone. You can't just download an update for this feature. #7 BoldbeastBest for enabling and disabling recordings as well. It allows you to set a password in order to access recordings as well. It also can record audio notes, lectures, meetings, and interviews. It will place a record button on your screen at the start of every call. Once you press it again. With cloud support, you can backup all your recordings on Dropbox. You can also choose to store them on your phone's hard drive or SD card. Managing your recordings is important. You can organize your recordings into different sections of the app. You can also favorite the most important ones to put them in a special tab. Most recording on/off during a callFile management for recordingsCloud Storage capabilityVerdict: For the most part, you can just install it and start recording. You may accidentally hit it with your face while on a call and that may start or stop the recording.#8 Auto Call RecorderBest for free cloud storage by date. If you don't want any sorting options, it's easy to organize your categories, that is possible too. You also have total control over where your audio files are stored as well as how they are organized. The great thing about an app like this is that you can save recordings and upload them to Google Drive. This means you can access them on any device, no matter where you are or what you're heading out on vacation, it's easy to take your entire business record with you. Access it from anywhere in the world. You also don't have to worry about losing data since everything Ignore everything Ignore contacts Record only incoming calls Record only outgoing callsPrice:OS:Features:Automatic Call Recording in 5 different modesUpload recordings to Google DriveFile management and sorting optionsVerdict:Like some other apps mentioned, the sound quality for the other party suffers a little. It's still good enough for what it does. It's easy to get started with and worth a download.#9 TapeACallBest for high quality audio for recorded callsOne of the best features of TapeACall is that there are no limits to recording time. You never have to worry about stopping before you're ready. Recordings are stored securely on your phone. They can be downloaded onto a computer as well. You can also upload them to Dropbox or Evernote and share them via text or email. With TapeACall, you can record all scheduled calls automatically. You can download each recording from your Google Calendar and make notes on what you need to do next. The app records both sides of the conversation and stores your recordings in the cloud. They're accessible to you immediately upon completion of the call. You can also have a recording playing in the background while performing other tasks. Its interface is easy to use, and it comes with more features than you might expect. Price: \$19.99 per year of first-year / \$39.99 per year after7-day Free TrialOS: Features: Record Calls in High QualityPlay Recordings in the backgroundCloud Storage to Evernote, Google Drive, DropboxVerdict: A versatile call recording app with tons of features. It doesn't come with a free tier, but you get what you pay for. Great sound quality as well.#10 Smart Voice Recorder you can easily record phone calls on your Android device. You'll also keep your personal information completely private and anonymous. This is a voice recorder app that can record in the background. You'll have to start recording on the app then turn your phone call on speakerphone. It will record the conversation with the built-in microphone. Then you can go back to the voice recorder to play the audio. Recordings from The Smart Voice Recorder app can be saved as .wav files. They are better quality than .mp3 or other compressed formats and allow for a wider dynamic range. The recording so you know when they occurred. Any call can be recorded. All you have to do is hit stop when you don't want it to keep recording. Price:OS:Features:Record in WAV and adjust the sample rateRecord in the backgroundAdjust the ba you install and open the app there will be a message that says you have to allow phone permissions. Hit ok, then yes to allow microphone and manage files. Then hit 'Deny' for access to manage phone calls. Final ThoughtsBe sure to verify the laws in your area and learn how to record phone calls on Android before using these apps. Using Notta may be the best way to record your phone calls out of all of the apps we mentioned. You won't have to give all of your phone's permissions to a third-party app. It only requires access to the microphone. You will also get an accurate transcript of any phone call. That way there will never be any discrepancies about what has been said
